

AGILE GREEN BELT

Leading Edge Group has developed a comprehensive series of Agile Belt programs that provide unique Agile training suitable for all staff members. The training is divided into three programs called Belts. Each Belt is denoted by a color to represent the level of competence achieved upon successful completion. Depending on the level of ability that you want to develop, you should choose the appropriate Belt program.

PROGRAM OBJECTIVE

The aim of this program is to gain a comprehensive insight into Agile thinking and its effective application across different sectors. This is a very practical program where you learn about the benefits of Agile and how to apply Agile tools and practices, making real change within your organization. Upon successful completion of the program, you will develop an in-depth understanding of Agile and be able to lead an Agile initiative in a pilot area or process.

KEY FEATURES AND BENEFITS

Businesses that embrace Agile practices can gain a competitive advantage, leading to an organization that is working together, better, smarter and faster. The Agile mindset allows organizations to respond to changing market conditions and customer needs through incremental, iterative work based on validating ideas before investing heavily. As a result, financial risk is reduced.

Some of the key features and benefits of this program for both businesses and individuals include:

- Accredited by the Institute of Industrial Engineers & Safety Management Systems (IIESMS)
- Immediate practical application and return on investment through Agile initiative
- Flexible schedule, finalized based on Client needs
- Developed and delivered by Agile subject matter experts
- Tailored to focus on Client specific applications
- Real world examples, case studies and scenarios to develop contextual understanding

KEY PROGRAM CONTENT

THE FOLLOWING TOPICS WILL BE COVERED AS PART OF THE PROGRAM CONTENT:

- Agile values and principles
- Selecting and validating an Agile initiative
- Execution and feedback methods
- Adaptability and responsiveness

LEARNING OUTCOMES

BY THE END OF THE PROGRAM YOU WILL BE ABLE TO:

- Demonstrate an understanding of Agile through practical application
- Define and explain Agile values and principles
- Appraise the applicability of Agile to various contexts and situations
- Apply a feedback gathering plan and prioritization system
- Select an Agile initiative and validate the idea
- Execute an Agile initiative through the application of Agile concepts and frameworks
- Reflect on their work through the Adapt & Inspect framework and make determinations of value based on same

ASSESSMENT AND ACCREDITATION

Participants are required to successfully execute an Agile initiative in a pilot area or process and complete an online examination. Online mentoring support is provided for participants throughout the program. This program is delivered over 5 full days or 10 half days.

This program is accredited by the Institute of Industrial Engineers & Safety Management Systems. Participants who complete the program will receive an Agile Green Belt certificate.
